GARDEN SOCIETY

**Seed list No 71
2022-23**

THE ALPINE GARDEN SOCIETY

SEED LIST NO. 71

Please read through these notes and also the notes on the back of the order forms before completing the forms. The main distribution will begin in December and will continue through January. Please note that the distribution takes place from Pershore and as the office will be closed over the Christmas and New Year holidays, no orders will be posted between 17 December 2022 and 5 January 2023.

This print version of the Seed List is only being sent out on request to members who are unable to access a computer and it is being produced in a simpler version than usual.

The seeds offered originate from various sources and cannot be guaranteed true to name. Neither The Alpine Garden Society nor any official of the Society can be held responsible for what is supplied. Members are reminded that named cultivars and hybrids cannot be relied upon to come true, and plants raised from seed from cultivars **should not be labelled with the names of those cultivars**.

All seed should be regarded as "ex" a named cultivar or hybrid.

Seeds of many species are in short supply and we can never have enough to meet all requests. If you request very rare or scarce species you may be disappointed and we advise you to spread your requests throughout a variety of seeds on the list. We do limit the allocation of rare species to try and be as fair as possible to all members, especially to those who donate the rare seed.

Online ordering is the recommended way to order and pay for seed. There are many advantages in ordering this way, including a built-in link to pictures of the plants on the list. You can make your selection, then come back later and change your selection. Ordering and paying is easy online and it is very helpful for the team making up orders. We will take care to ensure parity between online ordering and postal ordering so neither system will get priority. Please go to <http://www.alpinegardensociety.net/seed/exchange/> and follow the instructions on the page. Payment for online orders will be taken using a credit card on a secure site.

We do request that you only order by post if you have no computer access as cheques are becoming more time-consuming and costly to administer. We cannot accept payments by Direct Debit.

Surplus seeds are those remaining after all applications for main distribution seeds have been met. Please see the notes on the back of the order form for further information.

We are sorry but we cannot send seed to EU countries, Australia or Japan this year due to the requirement for Phytosanitary certificates which are very expensive to acquire. We can send seed to all other countries, including Ireland, Northern Ireland, Norway and Switzerland.

This year we have a good selection of damp packed seed of various species and named forms of Anemonella, Eranthis, Hepatica, Jeffersonia, Nerine, Razania, Sanguinaria and others. This seed is marked in the list as **D**. This seed has short viability and has been stored in special conditions to extend its viability. It has been kept damp since harvesting and has not been allowed to experience cold (which would hasten germination). It has then been repacked with damp vermiculite in individual zip lock bags. If you receive damp packed seed, it may already have germinated, so please handle carefully. It is best to carefully cut the plastic ziplock envelope and do not try to separate the seed from the vermiculite. Tip the whole contents into prepared compost in a pot and cover with grit. For hardy species, keep the pots in a shady place **outside in cold conditions** and do not allow to dry out. Do not cover the pots but allow them to be exposed to the weather. They should germinate next spring but if there are no signs of germination, leave them outside for another year as often this type of seed can take a year longer. If sowing is delayed, **do not put the seed packets in the fridge**, but keep at room temperature. Handle the Nerines very carefully as these are already germinating. Tip the contents carefully into a prepared pot. Place the pots in a frost-free environment until next spring.

Plant Breeders' Rights: Where plant varieties are covered by Plant Breeders' Rights, it means that there is a restriction on the use of that variety for production, reproduction or selling. These rights only apply if the plants are being used for commercial purposes. Since our seed list is only available to members of our society on a non-commercial basis, this is covered by the non-commercial use exemption. Our seed exchange can therefore offer seed which is otherwise covered by Plant Breeders' Rights but members should be aware that plants raised from these seeds may not be used for commercial purposes. To check whether a plant has Plant Breeders' Rights, please consult a current copy of The Plantfinder, or the RHS online Database

Wild Collected Seed

Genetic material collected from the wild since October 12th 2014 is covered by the Nagoya Protocol, which is legally binding in the EU, including the UK. For material from signatory countries, 'utilisation' is not permitted unless there is written consent from the country of origin. This includes development of new named cultivars and hybrids as well as production of new drugs and other

products. Cultivation, privately or commercially, is permitted. Unless explicitly stated otherwise, you should assume that seeds in this list do not have consent for utilisation, as described above.

We have sought assurances that all wild-collected seed offered in this list has been collected in accordance with the laws of the source countries and that its distribution is allowed under the terms of any permits to collect the seed.

We request that all donors of wild collected seed comply with the conservation laws of the countries they visit. For more information about the Nagoya Protocol, CITES and the CBD, please see the Conservation section on the AGS website: <https://www.alpinegardensociety.net/conservation/collection-of-wild-plant-material/>

Overseas Members

We remind members outside the UK that many countries restrict the importation of some species of seed. It is the responsibility of members from overseas to check the laws covering seed importation before ordering to make sure that anything they request is not on their country's list of banned imports. Failure to do this could cause confiscation and destruction of all the seed within the imported packet at the point of entry to your country. Overseas members should pre-check the list of approved species by contacting their local Ministry of Agriculture. We can only send bulbils, corms etc to the UK.

For orders from the US and New Zealand we will include a printed list of your seeds to meet your country's requirements, and we will do what we can to ensure we do not send banned species. However, it remains the responsibility of overseas members to ensure that the seed they are ordering does comply with their country's import regulations.

New Zealand: Please consult the following MPI database before ordering:

<https://www1.maf.govt.nz/cgi-bin/bioindex/bioindex.pl>

USA: Members will need a permit to import small lots of seed which needs to be sent to me by **email or post**. Please see additional information on the website. Banned species may be found by referring to the following list:

<https://www.nargs.org/restricted-seed>

Collection Numbers

Some seed originates from wild collected seed, and plants deriving from these collections may retain the collector's initials after several generations if they are felt to be a distinct form. Some of the collections, collectors and growers who are referred to in the list this year:

BATM	-	Nordic Expedition to Batman (Turkey)	HeHeHe	-	H Pettersson, H Sjöman & H Zetterlund
BSBE	-	Bowles Scholarship Botanical Expedition	JB	-	Jan Bravenboer
CC	-	Chris Chadwell	JCA	-	Jim Archibald
